ADDENDUM #3
Brine Supply
#19-7701-18

Date: May 13, 2019
Subject: Bid Clarification

NOTICE TO ALL PROPOSERS

You are hereby notified in writing that specification #19-7701-18 is being clarified as indicated below:

A clarification provided in response to questions regarding the City Brine Stream RFP:

The City has indicated a desire to see a value of \$10.00 per 1,000 gallons or \$0.42 per barrel for the brine stream. Although this is what the City desires, this amount is not required for the proposal or viability of the project. The City seeks a prepayment of \$100,000,000.00 for construction of a microfiltration / reverse osmosis water treatment facility at the City of Odessa Water Treatment Plant. The pay back will be in volume of brine stream and the time of recovery. The proposal providing the shortest term of payback and/or minimum volume of payback will provide the best value for the City.

The expected value may be achievable in the range of \$6.00 to \$10.00 per 1,000 gallons or \$0.25 to \$0.42 per barrel. Although prepayment is preferred, direct payment for water through a 'take or pay' provision can also be acceptable and will be considered for all proposals.

Replace Paragraph of 1.5 TERM OF CONTRACT with the following:

"The term of the contract shall be as stipulated in the proposal of the Proponent or as negotiated and agreeable to both parties (Proponent and City)."

The City of Odessa apologizes for any inconvenience this may have caused.

Please acknowledge receipt of Addendum #3 by signing in the space provided and returning this form with your bid response.

Very truly yours,

City of Odessa

JoAnn Samaniego
Interim Director of Purchasing
